(54) Title: VERIFICATION AND AUTHORIZATION OF A CONSUMER TRANSACTION

(57) Abstract: Disclosed is a computer-implemented method for the dynamic verification of a consumer engaged in a transaction with a merchant (12) and authorization of the transaction. The method comprises the steps of: providing a consumer transaction data set (16) including a plurality of data fields to a central credit issuer database (14); determining a processing queue (22) based upon the data contained in at least one of the data fields in the consumer transaction data set (16), the processing queue (22) including a plurality of prioritized target transactions (24); comparing at least one data field from the consumer transaction data set (16) directed to the consumer engaged in the prioritized target transaction (24) with at least one data field in at least one of the central credit issuer database (14) and a third party database (26); and determining a consumer/transaction identifier (36) based upon the comparison.

☒ Further documents are listed in the continuation of Box C.

See patent family annex.

\* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T"

later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X"

document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y"

document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&amp;"

document member of the same patent family
